## IELTS Academic Writing Task 1 Recent Actual test questions & answers

### Map

#### Report 1

The maps show the changes of Bell Hill Farm in 1976 and 2006. (Bell Hill Farm in 1976-->Bill Hill Environmental Centre 2006)

Summarise the information by selecting and reporting the main features and make comparisons where relevant.

### Sample Answer:

The map depicts the evolution of Bell Hill Environmental Centre, from Bell Hill Farm, in 30 years.

By comparing the 1976 and 2006 maps of Bell Hill, certain developments are noteworthy. Overall, it is clear that radical transformations occurred in the farm over the period, and it was totally converted into an environmental center in 2006.

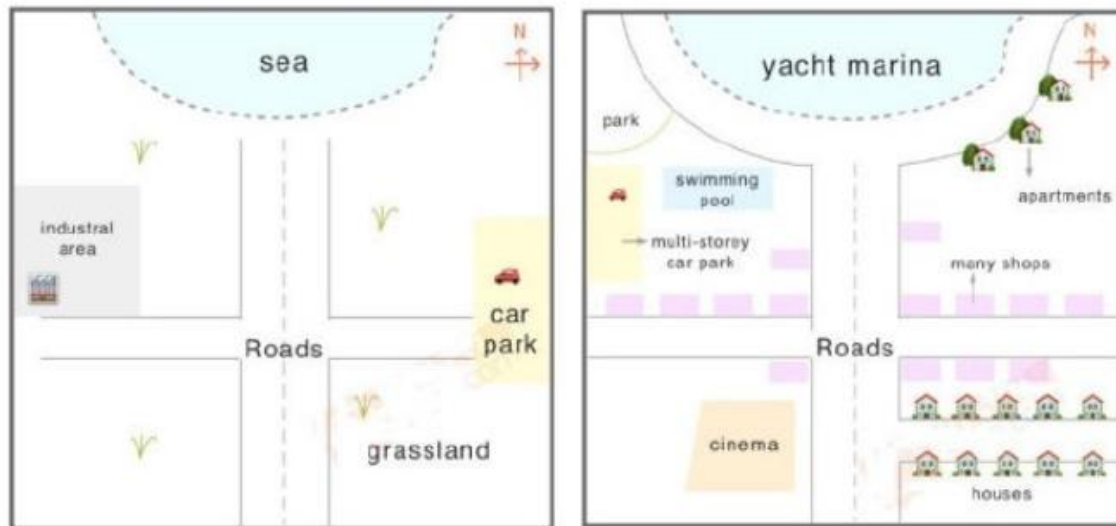

On the whole, in 2006, a multimedia room replaced the barn, which stored grain and other items, in 1976. In addition, a farmyard was demolished, and in its place, a recreation area was constructed. Towards the right side, the poultry area and cowsheds were transformed into student housing. Finally, we can observe that the agricultural machinery storage space at the upper left corner of the map has been converted into a vehicle parking lot. Probing further, the farmhouse in the bottom and roads in the bottom left of the map did not go through any changes.

## Report 2

Two maps show the change of a coastal town, called Pentland, from 1950 to 2007.

Sample Answer:

The given map displays the changes of the past 57 years in Coastal Town which is also known as the Pentland.

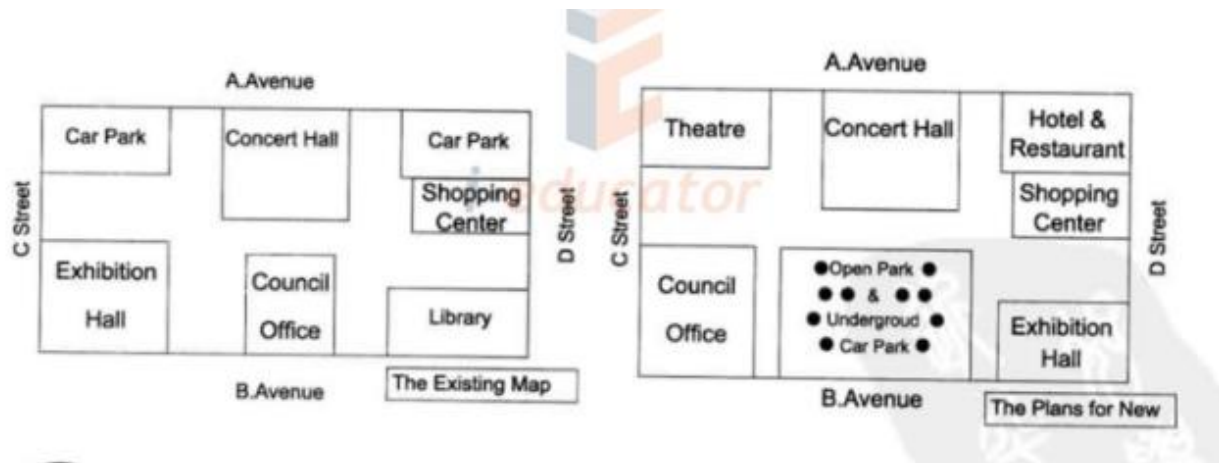

By comparing the 1950 and 2007 maps of Pentland certain developments are noteworthy. It can be observed that a lot of people moved to Coastal Town by 2007 as the infrastructure and facilities became accessible for them in Pentland.

Overall the main structure of the town with one main road with two bisecting roads remained similar. Whereas, the industrial area of 1950 located in the northwest region of the map was replaced with a park, swimming pool, multi-storey car parking and some shops in 2007. The car park on the east side of the road was removed and towards the right side of the eastern road, many new apartments and shops were constructed. Towards the southeast side of the Pentland was mainly the grassland in 1950, but with time many houses were built in that corner. Rest of the grassland area of the southwest corner of Pentland was converted into a cinema. Also the sea was developed into Yacht Marina covered by a half-circled road.

### Report 3

The civic centre will be planned to change. There are two maps: one is the existing and the other is the plan for new. Summarise the information by selecting and reporting the main features and compare the two maps.

Sample Answer:

The two maps illustrate the changes that need to be made in the civic centre. The first map shows the present status of the civic centre and the second map shows the suggested changes that need to be implemented.

In general, the overall structure of the civic centre will remain the same with few alterations suggested in the second map.

According to the second map, the car parking in the upper left corner will be demolished and a theatre will be built in its place. The car parking space in the upper right corner will be converted into a hotel and restaurant. The library will be removed and the exhibition hall will move from the lower-left corner to the lower right corner. The council office will be shifted from the lower central area to the lower-left corner and in place of the old council office, open park and underground parking will be constructed. Lastly, most of the area in the civic centre undergo modification except the concert hall and shopping centre.

## Report 4

The map below shows the development of the village of Rye mouth between 1995 and present. Summarize the information by selecting and reporting the main features and make comparisons where relevant.

### Instructions to follow

- You should spend about 20 minutes on this task
- Write atleast 150 words

### Sample Answer:

The two maps show the **layout** of the same village in 1995 and at present. It is **visible** that there is a new infrastructure for housing and reconstruction has been done at the cost of destroying the agricultural land and demolishing commercial fishing.

The **most important changes** that can be seen are the **disappearance** of the fishing port and the nearby fish market, as well as the **creation** of a golf course and tennis courts in the northeast, where farmland and a forest park were **located** in 1995. Moreover, a new housing development containing apartments is **now found** on the waterfront where the old fish market was located, and several restaurants have been built on the opposite side of these apartments, on the road where **previously** shops were located.

There is also **an increase** in the total number of houses, from 12 in 1995 to 16 at present. Also, the road towards a small housing development west of the main road has been **extended further**. The hotel and cafe in the south-east have **remained the same**. A new car parking area has been **constructed next** to the hotel.

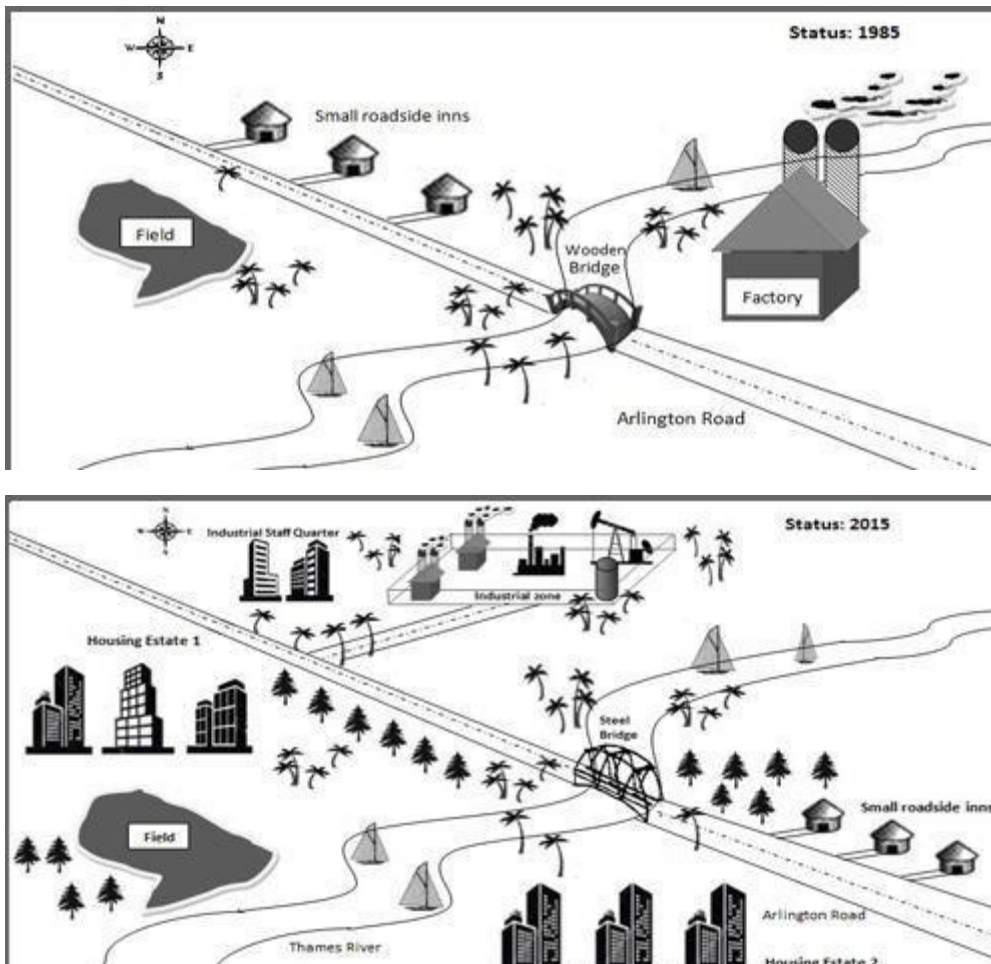

## Report 5

The maps show changes in the local industrial village in England called Stamdorf between 1985 and 2015.

### Instructions to follow

- You should spend about 20 minutes on this task
- Write atleast 150 words

### Sample Answer:

These maps **distinctively** show us the **difference** in the local industrial village of Stamdorf in three decades. **Overall**, a huge transformation has taken place in the village. There were new buildings built in the village by 2015.

There weren't many buildings in 1985 except for small roadside inns and a factory whereas in 2015, there were a large number of buildings like the housing estate 1 and 2, the industrial zone and the industrial staff quarter. The roadside inns on the left side of the Thames river were **shifted** to the right side of the river, in the south-east corner. There was a wooden bridge built across the Thames river connecting both sides of the Arlington Road which was later **replaced** by a steel bridge. The field was **further moved** to the south-west corner. The factory built-in 1985 was **demolished** and an industrial zone was built in the north side of the ride in 2015. **Surprisingly**, despite all the demolitions and changes, the plantations have **increased** in 2015 from 1985.

## Bar Chart

### Report 1

A bar chart shows the comparison of the reasons why people went to the British Library from 1991 to 2000. Summarise the information by selecting and reporting the main features and making comparisons where relevant.

### Sample Answer:

The above illustrated bar graph compares the percentage of the primary reasons behind people in Britain visiting the library between two given years - 1991 and 2000.

At one glance, it can be comprehended that there were only four reasons behind people using the library in both the years, namely to borrow or return books, obtain information, study, and to read newspapers or magazines.

Out of all the reasons, the borrowing or returning books was highest in both the years as compared to other reasons. While in 1991 approximately 65% of people visited the library to borrow or return books, in 2000, the percentage decreased drastically to 55%.

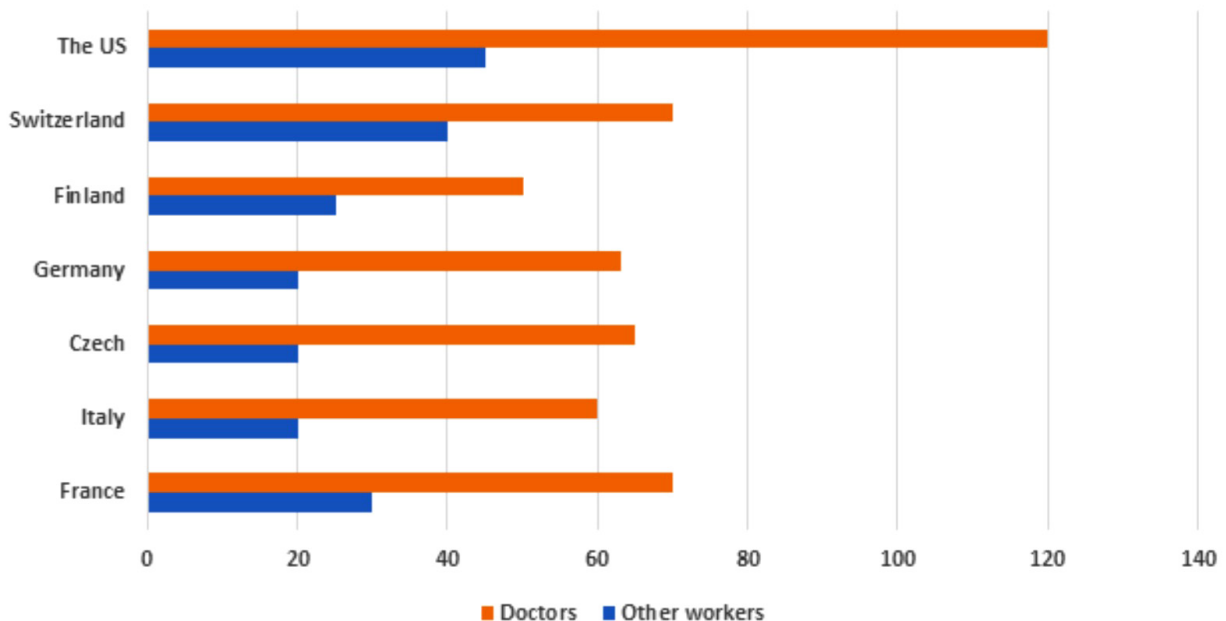

In contrast, the figure for obtaining information in 1991 was twice as much as in 2000, which is approximately 20 versus 10. For the reason of studying, the percentage declined further. Notably, in 1991, it was approximately 10% and in 2000, it was nearly 2%. Reading newspapers or magazines in 1991 was threefold, in comparison with in 2000.

## Report 2

The chart below shows the annual pay (thousands of US dollars) for doctors and other workers in seven countries in 2004.

### Sample Answer:

The bar chart is comparing seven nations in terms of their yearly payment for the stature of doctors and other workers in the year 2004.

It is evidently clear that doctors made more money in comparison to other types of work in every country during the given year. Furthermore, the average income of doctors in America and other workers turned out to be the highest as compared to the rest of the countries.

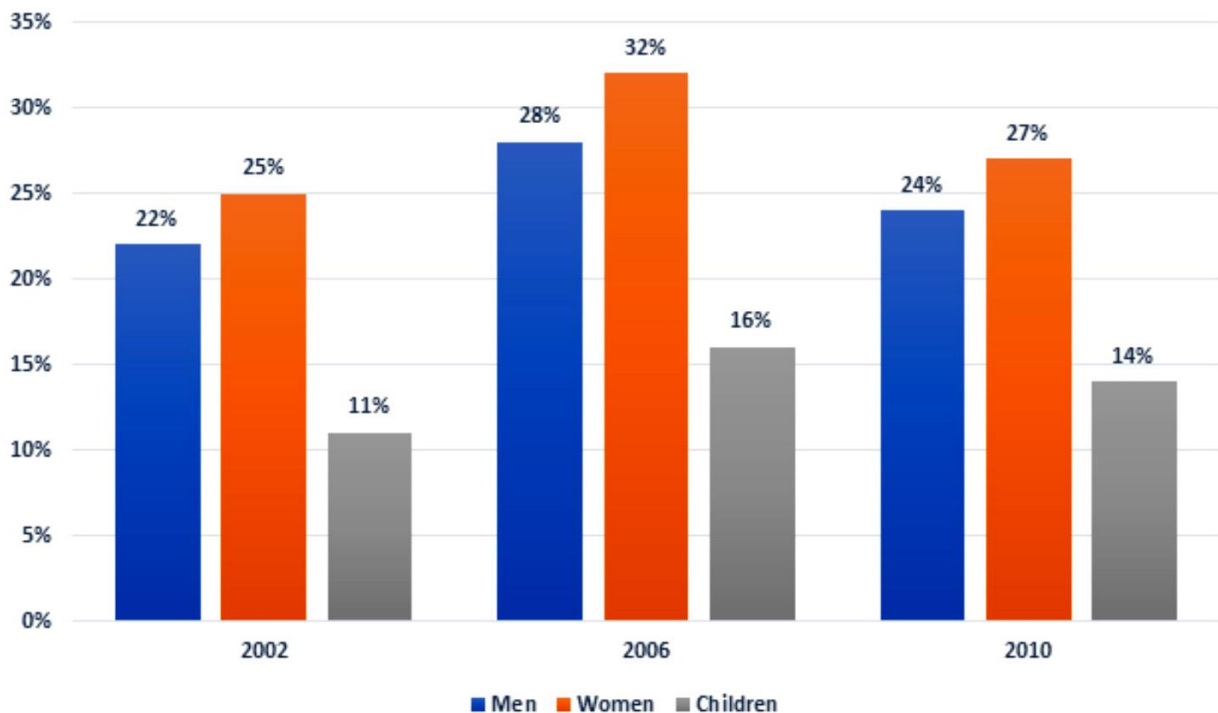

The doctors in America earned the largest amount of income, earning approximately \$120,000, compared to the ones in the remaining six nations. On the other hand, the figures in Switzerland and France were substantially lower, at close to 70,000 each. On the contrary, doctors in Finland earned merely \$50,000 as opposed to the ones in other nations, who earned around \$61,000 each.

In terms of the average salaries of other workers, the amount of money earned by others in America was approximately \$45,000. In Switzerland, it was exactly \$40,000, higher than in other countries. Roughly \$30,000 was given to other workers in France, about \$5,000 higher than that of Finnish counterparts. By contrast, the figures for the remaining countries were lowest, at exactly \$20,000 each.

### Report 3

The chart below shows the percentage of the population in the UK who consumed the recommended daily amount of fruit and vegetables in 2002, 2006 and 2010.

#### Sample Answer:

The chart signifies the proportion of men, women and children consuming the recommended amount of fruits and vegetables daily in three varying years.

At a glance, women were leading when it comes to fruits and vegetables consumption, while children were at the opposite end.

In all of the three years, there was a minor difference in the percentage of males and females consuming an adequate amount of fruits and vegetables each day. The highest percentage for women was in 2006, at 32% in comparison to men, at 28%. In 2010, both men's and women's figures were at the second highest rank. While women's proportion was at 27%, the men stood at 24%. And, 2002 witnessed the smallest percentage for both men and women, which was approximately the same as the figures of 2010.

The smallest proportion of people consuming the daily recommended amount was children in 2002, with only 11%, which was nearly half the proportion of men and women in the same

year. Post that, the percentage for children increased slightly, to 16%, in 2006 before decreasing marginally to 14% at last.
